

RAVIBALAN CHITHAMPARAVEL

Chennai, India | Backend & Database Developer | 8778236481 | ravibalan523@gmail.com

PROFESSIONAL SUMMARY:

Backend and SQL Developer with 3+ years of experience building and supporting enterprise-grade applications[ERP] using Node.js, Express.js, and Microsoft SQL Server. Strong expertise in T-SQL development, including stored procedures, query optimization, indexing, and ETL-based data integration for high-volume transactional systems. Proven ability in production support and performance tuning, ensuring data accuracy and system reliability. Progressed into a Team Lead role, guiding backend teams, enforcing code quality, and delivering scalable solutions through cross-functional collaboration.

TECHNICAL SKILLS :

- Databases: Microsoft SQL Server, PostgreSQL
- Languages: T-SQL, Python, JavaScript
- Backend: Node.js, Express.js, SQL, REST APIs
- Libraries & Tools: SSMS, SSRS, Prisma ORM, Pandas, Axios, Apache-AirFlow
- Cloud & AI: Microsoft Azure, Azure AI Custom Document Extraction, Azure Blob Storage, Serverless APIs
- Data & Performance: Stored Procedures, ETL Integration, Data Modeling, Microservices, Query Optimization, Indexing

EXPERIENCE & KEY PROJECTS:

BACKEND & AZURE AI DEVELOPER | JUN 2025 – JAN 2026

DOCUMENT CAPTURE MANAGEMENT SYSTEM | AZURE AI, OCR, SERVERLESS APIS, PYTHON

- Implemented Azure AI Custom Document Extraction, training models on 100+ document and image types (invoices, toll receipts, permits).
- Built serverless APIs for document ingestion, AI processing triggers, and result storage using Azure Blob Storage.
- Automated OCR extraction, data transformation, and field validation for complex document layouts.
- Used Python (Pandas) for post-extraction data cleaning, normalization, validation checks, and error analysis before database ingestion.
- Integrated cleaned datasets with backend billing systems for downstream workflows and reporting.
- Result: Reduced manual document processing by 40% and improved extraction accuracy.

BACKEND ENGINEER & TEAM LEAD | FEB 2025 – NOV 2025

BILLING & INVOICE PLATFORM | NODE.JS, SQL SERVER, REST APIS, MICROSERVICES

- Designed scalable backend architecture for an enterprise billing and invoice management system using Node.js and SQL Server.
- Developed secure RESTful microservices for billing workflows, document uploads, transaction validation, and financial reconciliation.
- Implemented stored procedures, triggers, indexing strategies, and query optimization for high-volume transactional data.
- Added duplicate detection and anomaly validation logic to improve billing accuracy and reduce manual review.
- Led a 6-member backend team, managing task planning, code reviews, and production support.
- Result: Improved reconciliation turnaround time by 45%, supporting millions of records efficiently.

SQL & BACKEND DEVELOPER | JUN 2024 - JAN 2025

FLEET & TRANSACTION ANALYTICS SYSTEM | SQL SERVER, NODE.JS, PYTHON

- Managed 50GB+ fleet and toll transaction data using Microsoft SQL Server.
- Designed and optimized database schemas and stored procedures under a monolithic architecture.
- Developed backend logic in Node.js for live toll processing, route optimization, and cost analytics.
- Used Python (Pandas) for data cleaning, reconciliation analysis, exception reporting, and trend analysis on transactional datasets.
- Automated trip reconciliation and reporting, reducing manual errors by 35%.

SQL DEVELOPER & DEC 2023 - JUN 2024

BILLING MANAGEMENT SYSTEM | SQL SERVER, STORED PROCEDURES

- Developed and maintained stored procedures, functions, and triggers for toll transaction billing and invoice generation.
- Implemented vendor-specific T-SQL logic supporting 20+ U.S. toll vendors with complex billing and reconciliation rules.
- Managed data validation, transformations, and reconciliation workflows entirely at the database level.
- Optimized queries and indexes to ensure consistent performance for high-volume transactional systems.

EDUCATION:

Bachelor Of Computer Application,

Madras University - Expected Dec 2026

Computer Engineering in Dip,

Mahendra Group Of Institution - Jul 2022
